Full-stack engineer with experience constructing durable market data systems, real-time analytics dashboards, and enterprise-grade UI components for finance and productivity. Aspiring to solve real business problems in finance and technology through modular, scalable, secure, and collaborative development.

EDUCATION

HONG KONG UNIVERSITY OF SCIENCE AND TECHNOLOGY

Aug 2022 - Dec 2026

BEng in Computer Science (Dean's List)

- **Certifications:** HackerRank Python, HackerRank JS, HackerRank Frontend Developer (React)

INTERNSHIPS & EXPERIENCES

Application Developer Intern

Mar 2025 - Oct 2025

Rabbit Credit Limited (Private Credit)

- **In-House Loan Management System (LMS):** Projected to **reduce manual data entry time** for employees **by 40%** enabling operations staff to focus on client service and reducing the risk of costly input errors.
- **Led cross-functional front-end development** for new Loan Management System, collaborating with backend engineers and business stakeholders to deliver seamless integration of user requirements and technical architecture.
- **Supervised and mentored an intern**, delegating feature tasks and providing technical guidance, resulting in accelerated delivery and improved code quality.
- Added endpoints to a **Spring Boot REST API**, communicating with Hong Kong's Credit Reference Platform for TransUnion and other Credit Providers.
- Authored and implemented a technical onboarding guide that reduced new **developer ramp-up time from weeks to days**, enabling faster contribution to production systems and minimizing support queries.
- **Frameworks:** Java Spring Boot, Jacoco, JUnit, React, Redux, GitHub Actions, Docker, PowerShell, MySQL, Nginx, vite

Full-Stack Software Engineer Intern

Jun 2024 - Aug 2024

Alpha Sherpa Capital Management (Hedge Fund)

- Migrated broker analytics from Jupyter to a production web app, empowering real-time analysis of position accuracy and expected gains by broker, region, sector, and position.
 - Implemented database-driven querying and interactive data visualization to empower traders with actionable insights.
- Built a modular ETL pipeline with Celery, results overnight, **reducing daily analytics latency by 50%** and ensuring seamless, rapid access to newly processed broker data during market hours.
- Re-architected the Tickers search interface to deliver fast, intuitive lookup by ticker/date, dynamic OHLC candlestick charts, and real-time broker rating overlays with interactive, filterable analysis.
- Optimized backend API and integrated live Refinitiv data, **cutting endpoint runtime from 2.5 minutes to 35 seconds** and enabling fast display of **200k+ broker reports** with sentiment and broker filters.
- Automated broker crawler scheduling by migrating from Windows to Linux, deploying Celery, cron, and Docker for fully asynchronous operations, **boosting uptime by 40%** and enabling real-time monitoring and on-demand task control via FastAPI endpoints and Flower dashboard.
- **Frameworks:** Typescript, NextJS, React, Sass, AGGridReact, MongoDB, Windows Task Scheduler, TailwindCSS

PROJECTS

Market Data Dashboard [GitHub]

Aug 2025

- Built a full-stack Next.js dashboard for **real-time US equity analytics**, integrating Yahoo Finance (live prices/history), Alpha Vantage, and Finnhub APIs for robust multi-provider data sourcing.
- Implemented **resilient back-end workflows** with custom error handling, live WebSocket streaming, and Supabase caching for optimized data performance and reliability.

Dussy Components - npm package [GitHub]

Jul 2025

- Developed and published a React component library (dussy-components) on npm, featuring a dynamic form generator, financial summary cards, and progress visualization tools, all built with TailwindCSS and ShadCN-UI.
- Engineered a **schema-driven form builder** that supports multi-section layouts, live validation (Zod, React Hook Form) and easy extensibility for enterprise dashboards.

ADDITIONAL

- **Language Skills:** English (Native), French (Business Proficient), Mauritian Creole (Business Proficient)
- **Work Authorization:** Mauritius (Citizen), Hong Kong (Student Visa)
